

1 Block Voting (Overview)

Block voting: Tickets vote to approve or reject the way the Proof of Work miner has constructed the block.

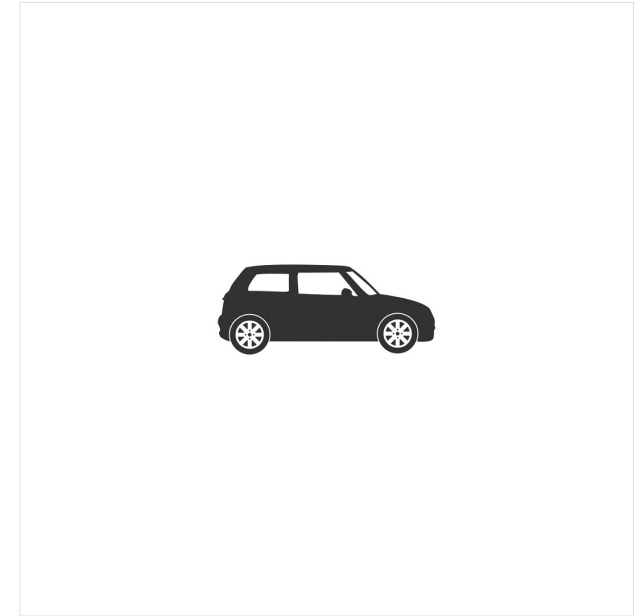

Sculptor Stakey standing proudly next to a Michelangelo-esque statue of a Ticket.

2 Block Voting (Votes)

Each Block calls 5 tickets to vote. These tickets validate the work of the Proof of work miners. 3 / 5 must vote for a block to be mined

A group of 5 Stakeys on a judging panel giving their verdict on the work by raising voting cards.

3 Block Voting (Rejection)

If the tickets vote to reject the block (or there's a tie) then the regular transactions are stripped out (including PoW miner reward).

Graphic Match of a boxy car with 5 tickets within. This fades between a version of the vehicle with no tickets within and striped of value.

4 Block Voting (Rejection)

▶ The regular transaction of the previous block are rejected and those transactions are returned to the mempool.

✂ Scuba Stakey floating back in the Mempool.

5 Block Voting (Incentives)

▶ This gives PoS ticket voters power to punish miner misbehavior.

✂ Judge Stakey in a judges wig wielding a pair of scales, gavel in hand.

6 Block Voting (Hard Forks)

✂ Stakey poised with a fork, tapping it on the ground from time to time.
